

Doctor of Physical Therapy Program

TTUHSC School of Health Professions

Introduction

Texas Tech University Health Sciences Center's, School of Health Professions, Doctor of Physical Therapy (DPT) Program affiliates with over 600 outstanding clinical education facilities within Texas and approved states throughout the continental United States. Students enrolled in the DPT program participate in a total of 32 weeks of full-time clinical experience and a 4 week Integrated Clinical Education Experience as outlined below. Students have the opportunity to work with patients of all ages and a variety of settings to provide them with entry-level physical therapy skills. Each student is expected to have clinical experience in both the Inpatient and Outpatient physical therapy practice settings during their eight-week rotations with the third and fourth experiences as an elective of their choice. They must also fulfill their neuro skills throughout the 32 weeks of full-time clinical experience.

Requirements

- Integrative Experience focusing on professionalism and generic abilities
- Inpatient Foundational Skills Experience (inpatient acute care; inpatient acute rehab; skilled nursing subacute rehab; long-term acute care)
- Outpatient Musculoskeletal Experience (OP orthopedic)
- 2 Elective experiences (any above setting or pediatric, wounds, pelvic floor, cardiac, rural health, neuro rehab, home health, etc.)

General Order of TTUHSC DPT Clinical Experiences

| Experience | Length | Program Year | Timing |
|-----------------------|---------|--------------|---|
| Clinical Experience 1 | 4 weeks | DPT 2 | July – August of second Summer semester |
| Clinical Experience 2 | 8 weeks | DPT 3 | August – October of third Fall semester |
| Clinical Experience 3 | 8 weeks | DPT 3 | October – December of third Fall semester |
| Clinical Experience 4 | 8 weeks | DPT 3 | January – March of third Spring semester |
| Clinical Experience 5 | 8 weeks | DPT 3 | March – April of third Spring semester |

Contact Information

TTUHSC DPT program is committed to providing excellent clinical education experiences for our students. Additionally, we desire to support the clinical instructors that are an irreplaceable resource to the TTUHSC DPT program. Questions can be addressed to the Director of Clinical Education (DCE) or one of the Assistant Directors of Clinical Education (ADCE).

Clinical Education Policies and Procedures

Guidelines and Choosing Procedure:

The TTUHSC DPT Program utilizes an optimization and data management program to manage the student placements and assessments. Students receive the list of clinical sites approximately one month prior to the selection of clinical sites. Students will rank their top 10 choices in the optimization system. The optimization system runs an algorithm to place each student at a clinical location based on their selections. Students are matched to a clinical rotation site based on student preferences, any special pre-approved accommodations, and experience availability. The Clinical Education Team will then review this list and determine final placements for each student. Students are not allowed to contact a site in order to ask about their facility without approval from the Clinical Education Team. In addition, students are not allowed to perform clinical experiences in facilities that meet the following criteria:

- The student was formerly or currently employed at the physical location
- The student performed more than 40 observation hours at the physical location within a three year time period prior to the start of the clinical rotation.
- The clinic is owned/operated/or staffed (PT) by student family members

Faculty assist students in selecting sites that will best meet their educational needs, but the final decision is up to the Clinical Education Team. Students that have demonstrated deficiencies in academic performance may be assigned to a specific clinical site by the CE team. Students may request special considerations for their clinical placements and must submit their request for consideration in writing at least two weeks prior to the beginning of the selection process. All requests are subject to approval by the CE team. Approval may require input from the Program Director and the Director of Student Services. Examples of special circumstances include, but aren't limited to pregnancy, documented health issues, family crisis, single parents, etc.

Student Initiated Clinical Slots:

Students are able to work with the clinical education team to set up no more than 1 student initiated clinical education slots for clinical experiences 2-5. The student must first submit a formal request using the **Application to Open a New Clinical Site: Student Initiated** to the DCE/ADCE responsible for coordinating student initiated slots. Students are required to meet certain criteria outlined in the application in order to be eligible to apply for opening a new slot. Students must also have faculty

Doctor of Physical Therapy Program

TTUHSC School of Health Professions

endorsement for this request prior to submitting the application. Once approved, the clinical education faculty member responsible for the student initiated process will then work with the facility and direct the student in next steps to secure a slot and ensure proper contracting is in place with the clinical location. Students should not contact facilities to set up clinical experiences without first completing a formal request to the DCE/ADCE by set deadlines.

Student Placements:

Once a student has been placed at a clinical site by either optimization or placement, the student's name and email address is sent out for confirmation of the clinical slot. 6-8 weeks prior to the start of the rotation, student information is updated by the student in the clinical data management system and sent to the designated SCCE for review. The student information form also contains links to (see **Appendix A**):

- Copy of the TTUHSC DPT Curriculum
- Grading Criteria

Once the student is onsite, the student will input Clinical Instructor Information in the data management system that will allow Clinical Instructor Assignments to be made. PT MACS assessments will be released at the midterm and then again at the final for completion by the CI via a link to the assessment sent from the data management system.

Cancellations or non-confirmations:

If a clinical experience is cancelled or the site was unable to confirm a slot, the DCE team will re-evaluate the list of remaining clinical sites or seek additional sites if necessary. The team will discuss various clinical site options with the student in context of areas where the student may have housing opportunities. Once the student provides the DCE team a list of the top three or four choices, a teammember will contact these facilities to see if accommodation can be made.

Clinical Experiences and Expectations:

Before the first clinical experience, students must pass a course (HHPT 8120 – Communication and Clinical Education) designed to prepare them for clinical experiences including documentation, communication, and use of the *Physical Therapist Manual for the Assessment of Clinical Skills* (PT MACS). The PT MACS is a clinical assessment tool used to measure a student's clinical competency while on the clinical experience. Grading criteria and behavior objectives for the clinical experiences courses are described in the HPPT 8120 course. Prior to subsequent clinical experiences, students are provided with syllabi specific to each clinical experience that lay out the grading criteria for each clinical experience. Additionally, students must demonstrate competence in clinical reasoning prior to all clinical experiences as measured by a comprehensive practical examinations that includes oral reasoning, plan

Doctor of Physical Therapy Program

TTUHSC School of Health Professions

of care development, and skill demonstration as part of the courses HPPT 8123 – Clinical Reasoning 1 and HPPT 8224 – Clinical Reasoning 2.

Upon arrival at the clinical experience, the student is expected to have the following items readily available:

- 1. Current proof of CPR certification
- 2. Current 2-step annual TB test,
- Current immunizations/vaccinations for Diptheria-Tetanus (current DpT or DT), Meningococcal Vaccine (MCV) for adults 22 and younger, and current seasonal Flu vaccination,
- 4. Positive titers are required for Hepatitis B, Measles-Mumps-Rubella (MMR), and Varicella (Chicken Pox), (see **Appendix B** TTUHSC SHP Immunization Requirement Form)
- 5. Current personal health/medical insurance
- 6. University liability insurance
- 7. Criminal background check (if required)
 - a. In most cases the DPT program will send an attestation letter for the background check run through the university using a private vendor
 - b. Additional/updated background checks may be required by the facility and payment is the responsibility of the student (see TTUHSC Criminal Background Check Policy)
- 8. Drug screen (if required)
 - a. Payment for and completion of required drug screenings are the sole responsibility of the student (see the TTUHSC Drug Screen Policy or DRS Student Handbook)

General behavioral objectives for 4 week clinical experiences:

At the end of the clinical experience, the student should be able to:

- 1. Demonstrate professional behavior in all interactions with patients/clients, family members, caregivers, interdisciplinary team members, consumers, and payers.
- 2. Adhere to legal practice standards, including all federal, state, and institutional regulations related to patient/client care and fiscal management.
- 3. Practice in a manner consistent with the APTA Code of Ethics and APTA Core Values.
- 4. Maintain a safe practice environment for both the patient and the therapist.
- 5. Demonstrate basic clinical decision-making skills including clinical reasoning, clinical judgment, and reflective practice.
- 6. Obtain and document a patient/client history for use in evaluation and clinical decision making.
- 7. Assist in determining a physical therapy diagnosis and prognosis that guides future patient/client management.
- 8. Collaborate with patient/client, family members, payers, and other professionals to determine a plan of care that is acceptable, safe, effective, realistic, and culturally competent to achieve the goals of the patient.
- 9. Provide physical therapy interventions to achieve patient/client goals and outcomes.

Doctor of Physical Therapy Program

TTUHSC School of Health Professions

- 10. If available at the clinic, supervise and manage personnel to whom tasks have been directed, including the physical therapist's assistant and aides.
- 11. Complete documentation that follows professional guidelines, guidelines required by health care systems, and guidelines required by the practice setting.
- 12. Identify the individual members of the clinical education team for the assigned clinical rotation and communicate effectively with each based on the team member's designated role.

General behavioral objectives for 8 week clinical experiences:

At the end of the clinical experience, the student should be able to:

- 1. Demonstrate professional behavior in all interactions with patients/clients, family members, caregivers, interdisciplinary team members, consumers, and payers.
- 2. Adhere to legal practice standards, including all federal, state, and institutional regulations related to patient/client care and fiscal management.
- 3. Practice in a manner consistent with the APTA Code of Ethics and APTA Core Values.
- 4. Maintain a safe practice environment for both the patient and the therapist.
- 5. Demonstrate clinical decision-making skills including clinical reasoning, clinical judgment, and reflective practice.
- 6. Examine patient/clients by obtaining a history, performing system reviews, and selecting and administering age-related tests and measures.
- 7. Evaluate data from the examination to make clinical judgments regarding patients/clients.
- 8. Determine a physical therapy diagnosis and prognosis that guides future patient/client management.
- Collaborate with patient/client, family members, payers, and other professionals to determine a plan of care that is acceptable, safe, effective, realistic, and culturally competent to achieve the goals of the patient.
- 10. Provide physical therapy interventions to achieve patient/client goals and outcomes.
- 11. If available at the clinic, supervise and manage personnel to whom tasks have been directed, including the physical therapist's assistant and aides.
- 12. Manage the Plan of Care in response to the patient/client status using appropriate patient outcome tools.
- 13. Complete documentation that follows professional guidelines, guidelines required by health care systems, and guidelines required by the practice setting.
- 14. Identify the individual members of the clinical education team for the assigned clinical rotation and collaborate effectively with each based on the team member's designated role.
- 15. Develop a personalized plan for how to become a clinical instructor (CI) and/or a site coordinator of clinical education (SCCE) following graduation and licensure.

Problem Situations:

TTUHSC physical therapy students are expected to perform in a manner that is safe, consistent and effective. Ultimately, the goal for 8 week experiences is that the student performs at an "entry-level" for

Doctor of Physical Therapy Program

TTUHSC School of Health Professions

the facility in which they are practicing. If a student has significant difficulties in any area, the Clinical Instructor should contact the clinical education faculty of the DPT program as quickly as possible.

Clear communication is the first step toward resolution of a clinical education problem situation. Problems and concerns should be clearly documented in writing by the clinical instructor, being sure to include specific instances and a description of efforts for resolution to this point. Once a problem situation is reported, a conference should be held between the CI and the clinical education representative. The clinical education faculty member will then discuss the situation with the student and work with the CI to develop a plan for resolution of the problem. Once a plan has been determined, the clinical education faculty member will clarify the plan with the CI and student and provide a time frame for follow up.

If a problem persists, it may be necessary to formally establish a learning contract for the student. Some examples might include a student continuing to be late for work, a student with repeated deficits with goniometry, etc. The purpose of the contract is to give the student certain criteria that must be met in order to continue on with or successfully meet requirements for the clinical experience. See **Appendix C** for an example of a learning contract. Once the contract is agreed upon, it is signed by the student, CI and faculty sign. If the student does not successfully satisfy the objectives set forth in the learning contract, the student may receive an unsatisfactory "U" rating on the related skills, the clinical experience may be terminated, and/or the student may earn a failing score for the clinical experience. Documentation of concerns and performance relative to the learning contract should occur in the *PT MACS* or by other means and should be submitted to the university clinical education team.

Early notification and documentation are key components to successful resolution of clinical education problems. The longer the problem goes undocumented or un-confronted, the more difficult it becomes to reach a satisfactory resolution. Appropriate documentation of student issues include: narrative comments from the CI concerning student performance, comments in the *PT MACS*, comments from other personnel involved in the issue (SCCE, nursing, OT, etc), documentation from the clinical education faculty from discussions with the CI and the student, and even copies of examples of poor documentation if this is an issue.

Assigning grades:

Clinical experiences are graded on a "pass/fail" basis and are based on the behavioral objectives and grading criteria outlined in the syllabus (see sample grading criteria in **Appendix D**). The clinical instructor is asked to evaluate the student objectively and mark the *PT MACS* appropriately. Areas evaluated by Director of Clinical Education include: number of skills completed in various sections, attendance, appropriate documentation of clinical education progress using the forms, safe and ethical practice in the setting, immunizations and insurance being provided, and VAS ratings provided by the CI. In cases of poor performance, the DCE team may seek further information or clarification from the student, clinical instructor, site SCCE, or other clinicians with experience with the student in question.

Doctor of Physical Therapy Program

TTUHSC School of Health Professions

Assignment of the "pass/fail" grade for each clinical experience is the sole responsibility of the course coordinator which is typically the DCE. The clinical instructor's feedback on the student's performance is considered heavily, however, the CI does not assign the grade for the student.

Failure to meet requirements for a clinical experience:

It may be determined that a student has failed to meet requirements for an experience based on the above process and the criteria listed in the Department of Rehabilitation Sciences Student Handbook. Students who fail an experience have the opportunity to perform a recycle experience if they meet the criteria set forth in the student handbook. Timing and location of recycle experiences are at the discretion of the DCE team.

Clinical education faculty responsibilities:

There are various people involved in the clinical education process: the director of clinical education (DCE), the assistant directors of clinical education (ADCE), the center coordinator for clinical education (SCCE), the clinical instructor (CI) and the student. The responsibilities for each role are described below:

DCE/ADCE:

- 1. Communicate and provide the school's philosophy and policies for clinical education
- 2. Provide important information to the facility related to the expectations of the academic program
- 3. Manage the clinical site selection process and communication with the clinical sites regarding placements
- 4. Monitor student progress during clinical experiences
- 5. Counsel with students and clinical instructors as needed

SCCE:

- 1. Facilitate communication between the clinical facility, clinical instructor and academic program
- 2. Organize and plan student scheduling and learning experiences
- 3. Counsel with clinical instructor and the student: provide training, feedback, evaluation of the clinical instructor performance

CI:

- Supervise the physical therapy student following facility policy and regulatory agency rules and
 policies. Students must be supervised by a licensed physical therapist when providing direct
 patient care. PT interns are encouraged to observe other disciplines, but only a licensed
 physical therapist can supervise a student physical therapist and must be onsite when the
 student is providing PT services.
- 2. Educate the student, providing learning experiences specific to the learning styles and needs of the student

Doctor of Physical Therapy Program

TTUHSC School of Health Professions

- 3. Plan and implement remediation when necessary and notify the DCE. Follow up visits will be conducted by the DCE with the CI and with the student on an as needed basis.
- 4. Evaluate the student, providing objective, honest, specific feedback in both formative and summative evaluations

Student:

- 1. Provide safe and effective patient care
- 2. Be an active learner
- 3. Self-evaluate performance
- 4. Comply with facility policies
- 5. Meet school grading criteria

Appendix C: Sample Learning Contract

Learning Contract for XXXX XXXX, SPT

TTUHSC DPT Program

January 1, 20XX

This contract for XXXX XXXX is being implemented due to concerns raised about clinical performance at XXXX in Lubbock, TX. Areas of concern include the following PT MACS skills and appropriate objectives:

- Skill 6: Problem Solving
 - o Objectives b, d
- Skill 9: Critical Thinking
 - o Objectives b, d, e, f
- Skill 10: Stress Management
 - o Objective d
- Skill 11: Safety During Patient Management
 - o Objective a

It is understood that the greatest area for concern involves the appropriate and smooth application of critical thinking and problem solving during patient evaluation, plan of care development, and patient treatment. It is understood that XXXXX, have discussed these deficiencies, and XXXXX, have discussed these deficiencies, and XXXXX, have discussed these deficiencies, and XXXXX is working to remediate the concerns. As a follow-up to these discussions, the following action plan is proposed. By the end of the internship on February 1, 20XX, XXXXX will:

- 1. Demonstrate ability to apply didactic knowledge to fluid patient cases of various diagnoses common to this practice setting. This includes:
 - a. Ability to integrate new information discovered during patient interview or examination into evaluation or treatment planning with minimal disruption of the evaluation or treatment session
 - b. Ability to prioritize problem lists as discovered from patient history and assessment and articulate possible solutions to these problems
- 2. Clearly and appropriately articulate ideas related to current patient cases including:
 - a. Adapting patient instruction and education in the light of ongoing assessment
 - b. Engaging in meaningful discussion with the clinical instructor related to patient cases or plans of care
- 3. Consider pertinent information regarding a patient case/current presentation in maintaining safe patient management including:
 - a. Adhering to physician orders and observing appropriate contraindications and precautions in patient care

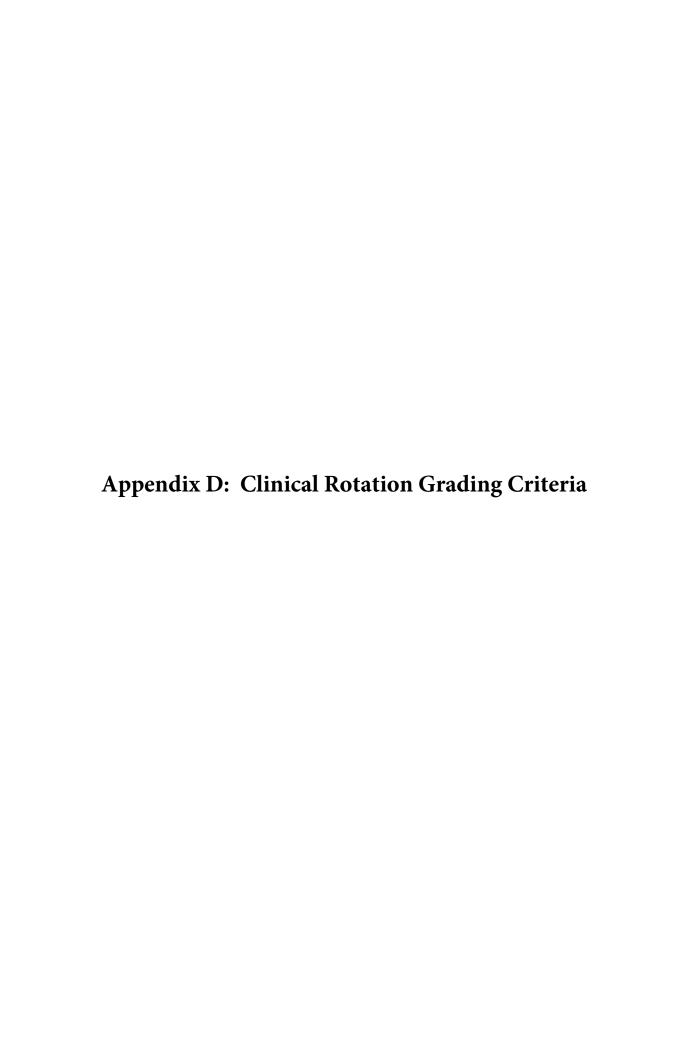

Appendix C: Sample Learning Contract

b. Ensuring a "least-harm" assessment and treatment philosophy that places the patient's comfort and well-being at the forefront

To meet expectations in this clinical internship, XXXX will work to achieve the above goals with minimal cueing from his clinical instructor and at a level that is commensurate with a new graduate physical therapist (entry level) in this setting. Signatures on this form indicate that all involved have reviewed the areas of concern and the action plan as written.

Clinical Experience 1

Grading Criteria

<u>Definitions:</u> "Complete" means a final rating of "Entry Level"

| PT MACS Section | Skill(s) | Expectations |
|--|--------------------------------------|---|
| I. Professional Behaviors | 1-11 | Complete at least 5 |
| II. Patient/Client Management | 12.1-12.3 | Complete skill 12.1 and practice the remainder |
| Tests and Measures | 13.1-13.14 | Complete at least 4 |
| Evaluation | 14.1-14.2 | Practice these |
| POC | 15.1-15.2 | Practice these |
| Interventions | 16.1-16.8 | Complete at least 4 |
| III. Management of Care Delivery | 17-22 | Complete skill 17 and practice the remainder |
| IV. Practice Management | 23-24 | Practice these if appropriate |
| V. Site Specific Skills | 25.1-28.2 | Complete 4 TOTAL by the end of all 5 internships |
| Other Requirements | | Expectations |
| In-service project | Skill 11 | Complete at least twice by the end of all 5 internships |
| Level of Performance on THIS Clinical Internship | Likert Scale rated by CI in EXXAT | Meets expectations for this level (score of 5 or more) |
| EXXAT Tasks | | Expectations |
| Clinical Information Form | Assigned in EXXAT | Complete by Friday of week 1 of rotation CI Information |
| PT Skills: Student Self- Assessment – Final | Assigned in EXXAT | Complete by Sunday at start of Week 4 |
| PT Skills: CI Evaluation of Student – Final | Assigned by student in EXXAT | Complete during Week 4 |
| PT Student Assessment of Clinical Experience | Assigned in EXXAT | Complete during Week 4 about clinical site |
| PT Student Assessment of Clinical Instruction | Assigned in EXXAT | Complete during Week 4 about clinical instruction |

Texas Tech University Health Sciences Center School of Health Professions-DPT Program

Inpatient Experience

Grading Criteria

| PT MACS Section | Skill(s) | Expectations |
|---|-----------------------------------|--|
| I. Professional Behaviors | 1-10 | Complete all 10 skills |
| II. Patient/Client Management | | |
| History/Systems Review | 12.1-12.3 | Complete all 3 skills |
| Tests and Measures | 13.1-13.14 | Complete at least 9 skills |
| Examination/Evaluation | 14.1, 14.2 | Complete both skills |
| Prognosis/POC | 15.1, 15.2 | Complete both skills |
| Interventions | 16.1-16.8 | Must complete 6 of the 8 skills (16.1 – must have 3 different modalities to consider complete) |
| III. Management of Care Delivery | 17 – 22 | Complete all |
| IV. Practice Management | 23 & 24 | Complete both if appropriate |
| V. Site Specific Skills | 25.1-28.2 | Complete a minimum of <u>4 TOTAL</u> by the end of <u>all</u> internships |
| Other Requirements | | Expectations |
| In-service project | 11 | Complete <u>at least twice</u> by the end of all internships |
| Level of Performance on THIS Clinical Internship | Likert Scale rated by CI in EXXAT | Meets expectations for this level (score of 5 or more) |
| EXXAT Tasks | | Expectations |
| Clinical Information Form | Assigned in EXXAT | Student completes by end of week 1 |
| PT Skills: Student Self-Assessment – Midterm | Assigned in EXXAT | Complete by Sunday of Week 4 |
| PT Skills: CI Evaluation of Student – Midterm | Assigned by student in EXXAT | Complete during week 4 |
| PT Skills: Student Self-Assessment – Final | Assigned in EXXAT | Complete by Sunday of Week 8 |
| PT Skills: CI Evaluation of Student – Final | Assigned by student in EXXAT | Complete during Week 8 |
| PT Student Assessment of Clinical Experience | Assigned in EXXAT | Complete during Week 8 about clinical site |
